To whom it may concern,

It is my pleasure to recommend Leland Curtiss. His performance at GIW as an Engineer and Manager of the Engineering Information Services Group for the past 10 years has shown he is a valuable asset and top notch employee.

I have known Leland for ten years with him directly reporting to me the past five years in my capacity as Chief Engineer at GIW Industries. Based on his work output, creativity, and technical aptitude, I consider him one of the best engineers in our company. In addition to engineering support, Leland managed a group of four to five direct reports.

Leland distinguished himself by providing leadership, solutions, and technical support during GIW's recent SAP transition. Leland is intelligent, and his ability to create new processes, understand, and solve technical issues has made him a go-to resource for support in our company.

If his performance in our company is a good indication of how he would perform in yours, he would be an extremely positive asset to your program.

If I can be of any further assistance, or provide you with any further information, please do not hesitate to contact me.

Yours Sincerely,

Brian Prochaska
